

Stacked area chart showing the relative contribution of various countries to the total number of COVID-19 cases in the United States from January 1 to January 20, 2020. The y-axis represents the relative contribution (0 to 10), and the x-axis represents the date. The chart shows a significant increase in the relative contribution of the United States (F) starting around January 10, 2020, reaching a peak of approximately 10 by January 20, 2020. Other countries like Canada (CAT), Denmark (DIS), Mexico (MCD), Korea (KO), Peru (PER), and the United Kingdom (WM) also show varying contributions over time.
